MT Guidebook — CTL2001-Style Template: Color Rules

Reference for the Activity/Assignment Template (v10). Applies to future revisions of the base design.

Fills

Token	Hex	RGB	Used for
Dark green	#0F6E56	15, 110, 86	Day chip background
Light green	#E1F5EE	225, 245, 238	Day banner, steps table row 1, portfolio output box
Grey	#FAFAFA	250, 250, 250	Readings box, reflection prompt box
Orange	#FAEEDA	250, 238, 218	Callout box

Text

Token	Hex	Used for
Dark green	#0F6E56	Course code, date, activity subtitle, tags, "Readings for today"/"Reflection prompt" labels, OVERVIEW/STEPS headers, step numbers, step names
Black	#000000	Course-bar secondary text, activity title, step time — independent, not derived from any other token
Brown	#854F0B	Callout heading

Border relationships

Three different rule types are in play — worth keeping straight when a color changes:

Border	Hex	Relationship	What happens if the source changes
Dark green accent (readings box, reflection prompt box	#0F6E56	**Linked / direct reuse.** This is the dark-green *text* token, reused	Automatic. Change the dark green text color and this border

— 4px left border)		as-is. Not a separate stored value.	updates with it — no extra step.
Green border (steps table rule lines, portfolio output box)	#A9B8B3	**Derived by percentage.** Light-green fill (#E1F5EE) darkened 25% uniformly across R/G/B (fill × 0.75).	Manual recompute: take the new fill's R/G/B, multiply each by 0.75, round.
Orange border (callout box)	#E3B341	**Derived by fixed offset, not a percentage.** Orange fill (#FAEEDA) plus a per-channel shift: R −23, G −59, B −153.	Manual recompute: take the new fill's R/G/B and apply that same offset (not a percentage — blue drops much harder than red/green).

Notes

• The 25% darken rule for the green border was chosen after testing 35% (too dark) and 15% (original, too subtle) — 25% was the accepted middle point.
• The orange offset is intentionally asymmetric, not a percentage rule — copying it channel-for-channel onto a different hue (e.g. green) shifts the hue itself rather than just darkening it, so it should not be reused outside the orange fill/border pair.
• Open item: the callout box currently relies on color alone (green vs. orange) to signal meaning, with no icon or border-style backup — flagged to raise with Alex M before this template is finalized.
